PROFESSIONAL EXPERIENCE

TechDeva Infotech   Chennai | April 2021 - Present

- Designed and developed a full-fledged delivery web application using React and its libraries, supporting multiple user roles (tenants, customers, and riders).
- Implemented end-to-end order management functionality, covering all stages from order creation to delivery.
- Leveraged Redux for state management, optimizing state transitions for high concurrency and real-time updates.
- Developed and integrated RESTful APIs for secure and efficient data exchange, ensuring high performance and reliability.
- Increased new customer acquisition by 70%, making the product the fastest-growing in Techdeva Infotech through improved user experiences and interfaces.
- Refactored legacy code, reducing execution time by 30% and memory usage by 20%, implementing best practices for clean and efficient coding.
- Reduced code redundancy by 25%, applying DRY principles to enhance code modularity and reusability.
- Developed the ultra modern Smart Salon Application for the new age business, to access   business all time, everywhere.

FREELANCE PROJECT

Deepam Engineering   https://deepamengineering.in/

- Developed a comprehensive website for Deepam Engineering, a leading building demolition company in India, highlighting their portfolio and industry accomplishments.
- Enhanced their digital footprint, attracting new clients and boosting online presence.
- Achieved a 40% increase in client engagement and a 30% rise in new project acquisitions, driving significant business growth.
